

Utah Weatherization Program Notice

Effective Date 22 February 2014

UWPN # 2014-012

Subject: Energy Burden Reinstatement & Priority Point Modification

Basis: Guideline Change

Purpose: This change returns the awarding of priority points for Energy Burden and adds other points for Energy User Percentage and Non-Metered Fuel.

An Excel workbook, Client Qualification, has been created to aid in calculating the new points. It is not mandatory to use this. If there is any additional support needed to implement this please contact us.

Scope: This change affects all current clients on the waiting list and all future applicants. This change will not affect production.

Responsibilities:

Local Agencies –

- Implement new policy and conduct in house training to inform staff.
- Add 40 points to all existing clients on the agency's Waiting List to offset the impact of the new points.

State WAP Staff –

- Amend program guidelines and publish.
- Create and issue Client Qualification workbook.
- Provide additional support as needed for implementation.
